

# TIME WORLD NEWS

## Roadshow is driving across Europe - also in 2011

The Versalift Roadshow has, until now, visited a large number of companies in several European countries.

We present our new models for current and new customers.

Visiting the companies at their own parking ground and bringing up to 10 dif-

ferent lift vehicles gives the customer a fast and visual knowledge of our product line. We are at the company early in the morning or by the end of a working day allowing the company to invite as many from the staff as they like.

## 300 kg more payload on a 5 T MB Sprinter

TIME Denmark has, as the only lift manufacturer in Europe, received approval to deliver a Mercedes Sprinter with usually 5 T maximum weight in a 5.3 T version.

We have always worked closely with Daimler in Germany, which supplies many vehicles to the TIME group. This close cooperation, together with our high number of sales, is the reason that we now can offer both our existing as well as new customers 300 kg more payload.

At the factory in Denmark we have the last several months built around 35 Mercedes Benz Sprinters.

Already now we have 10 Sprinters in Denmark registered to 5.3 T gross weight, and customers in Sweden, Finland, Norway, Germany has seen the potential in this opportunity for the extra payload.

# TERL

TIME Europe Rental & Lease "TERL" offers a new opportunity to finance your new Versalift.

With TIME Europe Rental & Lease we are up front with the latest new models.

TIME Europe Rental & Lease gives the customer access to the latest VERSALIFT models and vehicles without the large investment in replacing older lift vehicles.

Multiple users are sharing the investment and maintenance, thereby enabling significant cost savings for everyone.

Contact us to learn more.

## It is all about safety!

Our customers can rely on their Versalift, bringing them safe up and out to working position. With TIME's new modern testing equipment (hydraulic tilting platform) and experienced staff we perform high professional stability test, and provide our customers with a thoroughly and

carefully tested lift vehicle.

TIME's testing facilities are up-to-date. Our hydraulic testplatform allows us to test all lift- and vehicles combinations up to 36 T GVW, on a slope up to 10° longitude and latitude. Lift vans and truck with and without

outriggers.

Each and every vehicle leaving Team TIME is tested in accordance with EN 280 and ANSI/SIA A92.2. The bucket is loaded with x 1,5 times max. bucket capacity and tested in the most

demanding angels of the lift rotation area. After having been static tested at 150% of the max. bucket capacity the lift vehicle is thoroughly examined. All welds, bearings, rotations, tubes a.s.o are inspected for any irregularities. When no remarks are made, the lift vehicle is ready to leave the factory, for SAFE use by our customers.

# Versalift Distributor news

## Powered Access, Hungary

Powered Access Hungary has recently sold an insulated VST-5500-MHI mounted on a Iveco Eurocargo 150E28WS Tracker 4 X 4 and a Versalift ET-36-LF mounted on a Unimog U400 with railway track equipment and quick shift Versalift system.

## Oxley, Italy

A VST-7500-MHI mounted on a Mercedes Benz Zetros has left the factory in Denmark with direction to Italy. The machine has a working height of 25 m and is insulated to 420 KV and will be in service by Terna in March.

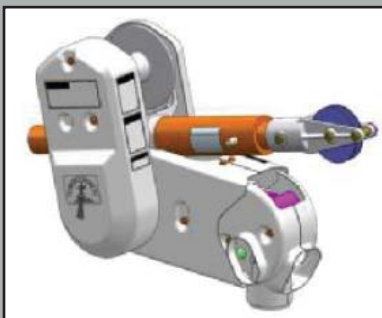

# Versalift Product news

## Elevator for the VN models

The very compact and durable elevator from the over-center VO265/270, is available for the non-overcenter VN43/50/55/60 models, adding 10 ft. to the platform height, and a very useful vertical boom axis movement, that makes the articulating unit more versatile.

## New compact hydraulic jib for VST

An all new hydraulic articulating Jib is now available for the VST's, in addition to the two existing Jib.

## Line lifting accessories

A range of Line Lifting accessories are now available from Time Mfg. including a hydraulic Line Lifter with 300 kg. capacity, developed and marketed by our New Zealand distributor, Waimea Truck and Crane. Contact Mr. Kingsley Thomas for more info on this unique product.
